→ Mr. Weaver-Anniston
Dr. Jenkins-Anniston

10-4-45

On September 23 we gave Mr. Becker a copy of Pyranol specifications and test methods dated August 30, 1945 (data folder No. DF-65206).

This data has only recently come in from General Electric and we thought it advisable that Mr. Becker have the information with his on his recent trip to Pittsfield, and he can now turn the data over to the proper parties. We do not have any extra copies and you may want to have photostatic copies made for distribution. If you do have any photostatic copies made please include two extra sets for us and three sets for Mr. H. F. Weaver, Monsanto Chemical Company, Anniston, Alabama.

We would be interested in having any comments on the Pyranol specifications and test methods as given us by General Electric.

Robert S. Weatherly

RR

Dr. Jenkins: Attached is a copy of the Pyranol specifications and test methods dated August 30, 1945
