

Every $9\frac{1}{2}$ inches
The DUTCH BOY trade-mark . . .
The NATIONAL LEAD CO.
name

This marking now on lead
pipe your assurance of
proper wall thickness

HERE'S lead pipe of high quality that you can always identify! National Lead pipe is now stamped every $9\frac{1}{2}$ inches of its length with our name and the Dutch Boy trade-mark. This is your assurance of proper wall thickness, of correct weight per foot, of a uniform, dependable product.

When you install lead pipe, you are making sure of a first-class, long-lasting job. Lead pipe never rusts, never clogs with rust-scale. You can use *smaller* pipes and still insure a permanent, adequate water supply.

And lead pipe offers short-cuts in installing. It's flexible. You can string it like wire, and make bends without the use of elbows. It comes in any length you need . . . requires few joints to complete an installation.

When you want to do a job that won't develop leaks or trouble . . . urge your customers to install lead pipe.

When you buy Dutch Boy Solder, you can be sure of getting the same composition each time. Every bar, every ingot, is numbered to denote its grade. And there's a grade for every soldering purpose, including wiping.

National Lead Company: New York, Baltimore, Buffalo, Chicago, Cincinnati, Cleveland, St. Louis; National-Boston Lead Co., Boston; Georgia Lead Co., Atlanta; Gibson & Price Co., Cleveland; National Lead & Oil Co. of Pa., Pittsburgh; John T. Lewis & Bros. Co., Philadelphia.
