Dr. Robert A. Kehoe
The Kettering Laboratory
University of Cincinnati
College of Medicine
Eden Avenue
Cincinnati 19, Ohio

Dear Dr. Kehoe:

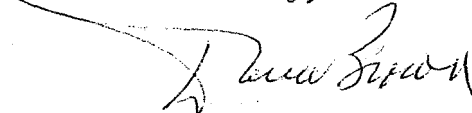

Our Company is being sued by an individual who claims that as a result of gasoline leaking into a water well she contracted lead poisoning.

You and I have discussed matters of this kind in the past and I understand that it is not possible for a person to contract lead poisoning by drinking water contaminated with gasoline. Our Company is being defended in this lawsuit by Mr. Uhel O. Barrickman, an attorney of Glasgow, Kentucky. Mr. Barrickman will be in the Cincinnati area on June 22 and, if possible, he would like to confer with you on June 22, preferably in the afternoon. If you are unable to see him on June 22, would it be possible for you to see him in the late afternoon of June 23?

We will greatly appreciate your being kind enough to talk to Mr. Barrickman. I am sure that you would be of great assistance in discussing this matter with him.

Please let me know whether he can have an appointment with you.

Sincerely,

Dana Brown
