Explosives for Economical Mining

ECONOMY and efficiency of mining operations are dependent in no small measure upon the thoroughness with which the explosives do their work.

In its 119 years of manufacturing for export trade, E. I. du Pont de Nemours & Company have specialized on the production of all classes of explosives—each type best adapted to perform a particular class of work at lowest cost. There is a Du Pont Explosive, which, in strength, quickness, sensitiveness, resistance to extremes in temperature and to water, will best meet every mining condition. Our technical division will

gladly help in the selection of proper explosives for your particular work.

Thirty-six Du Pont Factories, comprising the largest capacity in the world for the manufacture of explosives, insure prompt and economical shipments. All Du Pont explosives are tested to conform with the requirements of the U. S. Government Bureau of Mines. Shipments are specially packed to conform to all local requirements.

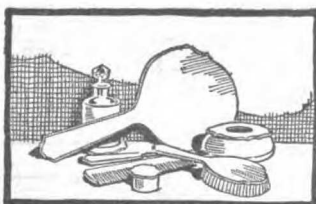

There is a Du Pont Blasting Accessory for every purpose—fuse, caps, electric blasting supplies.

At its inception in 1802 E. I. du Pont de Nemours & Co., Inc., were manufacturers exclusively of explosives. The enormous growth of the organization has resulted in a development into the manufacture of the closely related chemical products described below.

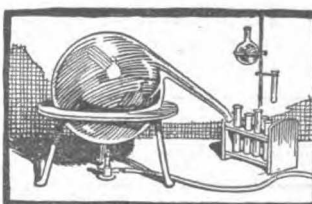

PAINTS & VARNISHES

For all Exterior and Interior Uses, for homes, factories, railroads and ships. White Lead, dry and in oil. Lithopone, Zinc in oil. Dry colors.

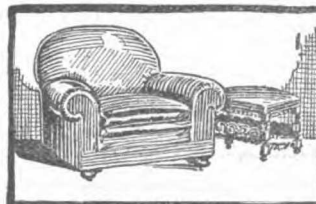

PYRALIN

Toilet Articles made in Ivory, Shell, Amber and Colortone Pyralin. Pyralin also made in Sheet, Rods and Tubes, transparent and colored.

CHEMICALS

Industrial Pharmaceuticals, etc., Dyestuff Intermediates, Pyroxylin Lacquers and Enamels, Leather finishing Solutions, Bronze Powders.
