1. INTERLOCK BYPASSING

Comments received from the PMSB in November were incorporated into the new P-Bulletin on protective devices. In addition, portions of P-0123 on relief valves have been added. The P-Bulletin is now being circulated for final approval.

2. NEW PLANTWIDE SAFETY PROGRAM

The LP&S superintendent reviewed a proposal for a program aimed at increasing safety awareness in the first quarter of 1982. SAC was favorably impressed and recommends he review it with the PMSB in December.

3. MANAGING and COMMUNICATING SAFETY PROGRAMS - SUPERVISOR TRAINING PROGRAM

LP&S briefly described a new program aimed at improving one-on-one communications on safety. SAC requested more detail from LP&S at their January meeting.

4. STATUS of P-BULLETINS

SHAC has studied all P-Bulletins to determine which need updating. LP&S and SAC reviewed SHAC's findings and assisted in assigning responsibilities for updating. These will be explained at the December PMSB.

5. CONTROL ROOM CONSTRUCTION - S&PP SURVEY

LAM014567

SAC recommendations on this subject will be discussed at the December PMSB.

Wearing of Hard Hats In Vehicles In Plant

At last months PMSB, SAC was asked to develop a policy concerning the wearing of hard hats in vehicles in the plant. The SAC Committee recommends that it not be manditory that hard hats be worn in vehicles which have steel roofs. ~~SAC does recommend, however, that hard hats be carried~~ ^{must be} in the vehicle when driving about the plant to be used in the event of an emergency when cars are stopped and the personnel need to evacuate the area.

B. Interlock By-Passing

A proposed P-Bulletin on By-Passing and testing of protective devices has been revised and will be distributed at the November PMSB Meeting for review.

C. Biennial Loss Reviews

After some discussi n on whether these loss reviews should be held more or less frequently than every two years, the L P & S Superintendent requested that his department investigate the status of our Biennial Loss Reviews and will report back to SAC in December.

D. Safety Showers - New ANSI Standards

Bob Hammann of L P & S reviewed the new ANSI standards pertaining to emergency eye wash and shower facilities and recommended that five (5) features be incorporated into plant stations. Some of these features appear to be expensive and give only marginal or questionable improvements. SAC in recommending that SHAC:

- a) Define a standard for new safety showers and eye baths in the Texas City Plant.
- b) Determine what, if anything, should be done to bring the current safety shower and eye bath stations up to OSHA and corporate standards
- c) Determine the need for and problems presented by making all shower stations freeze protected.
