

June 21, 1935.

Mr. J. W. Proulx
Canadian National Railways
Room 301, 355 McGill Street,
Montreal, Quebec,
Canada.

Dear Sir:

Your letter of June 15th addressed to our Canadian representative has been referred to me.

I feel quite confident that the claimant referred to in your letter has not had his health effected by Ethyl Gasoline at least insofar as the lead content of the latter is concerned.

I am, however, taking the liberty of referring your letter to Dr. Robert A. Kehoe of the University of Cincinnati who is an authority on this subject and will ask him to write you directly.

Very truly yours,

Graham Edgar

GE/LRJ
