

FEB 22 1955

INTER-OFFICE LETTER FROM Cleveland Hdqs. OFFICE Stocks & Distribution DEPT.

FOR OFFICE DATE February 21, 1955
 MR. SUBJECT New York City Label Regulations
 ANSWERING LETTER OF DICTATED BY

STOCKS & DISTRIBUTION DEPARTMENT
 General Letter #416

The city of New York has adopted a law requiring certain warning labels on all materials sold within its limits with a content of over 1 per cent lead or other compounds harmful if eaten.

They have agreed to permit shipment from Factories and Warehouses of these products bearing old labels without the warning notices until May 1st. This will give manufacturers an opportunity to dispose of stocks carrying labels which do not conform.

A Brief has been filed with the city authorities to extend the deadline to November 1st. However, it is questionable whether this extension will be granted.

In the meantime, we will aim for a complete change-over by May 1st. The matter will be reviewed some time prior to May 1st to determine what stickers, if any, may be needed to take care of stocks under the old labels.

In the meantime, all new labels pertaining to the products involved printed at North Olmsted will carry the required warning clause. As these labels become available, the old existing labels at Newark will be transferred to enable Newark to begin using the new labels as quickly as possible.

Attached is a list of products which must carry the special warning labels H-B 55, K-B 55, L-B 55. This list is correct as of February 11, 1955 and is subject to change.

Some of the products involved are not made at Newark; therefore, the producing Factories of these particular items will want to change over to the new labels as soon as possible so that shipments going to Newark will be on the new basis in order to avoid the use of stickers at a later date.

J.J. Rinko
 Genl Mgr. of Stocks & Distribution
