NOTED
V. B.

Dear Mr. Woodard:

In reply to your letter of March 2, it is true that the proposed asbestos article is under preparation. However, it temporarily had to be put aside in order to complete the index for the beryllium symposium publication so as not to hold up the publisher, who at long last is pushing this through for us. It is now being pushed through and we will then proceed to give our full attention to the preparation of the asbestos paper.

In order to make a well rounded article for publication, we intend to include a number of additional photographs of tissue sections which were not part of the original report. It is anticipated that this material will be in your hands before the end of the month for your review and suggestions. On Doctor Vorwald's return, the first of next month, he will go over it for final editing.

At this time we cannot name a definite date of publication, but we certainly expect to have the manuscript in proper form to submit to the publisher during the month of April.

Sincerely yours,

/s/ Lillian R. Elin
