ASBESTOS

For your information we are attaching a copy of Dr. D'Alonzo's letter of November 8, 1966. This information was recently sent directly to each of our plant physicians. We believe you will be particularly interested in the comments on asbestos, admittedly a very controversial issue, at this time.

Incidentally, Dr. D'Alonzo's letter comments on several other items in addition to the subject, but our primary purpose in sending this letter to you is to call attention to the potential asbestos problem.

WDG/law

W. D. GARWOOD, MANAGER
