Monsanto Company
277 Park Avenue
New York, New York 10017

ATTN: Mr. Randal Graham

Dear Mr. Graham,

In compliance with your request, we anticipate a maximum of scrap aroclor during the year 1971 with the forecasted usage, as previously supplied, of approximately 85,000 gallons.

Please keep me informed on:

(1) Monsanto's position on its own incinerator.

(2) Rollins-Furle position on incineration of not only waste aroclor but scrap capacitors.

(3) The PCB - environmental pollution situation.

Yours very truly,

JARD COMPANY, INCORPORATED

Richard L. Rollins
Vice-President
Engineering

RLR:t

P. S. Have you seen the Article in Environmental Science & Technology, October, 1970 on PCB's - prevalent and persistent?
