

ETHYL CORPORATION

INTER-OFFICE

To	Mr. Stanley D'Armond	ADDRESS	BR Plant
FROM	Edward G. LaCour, M.D.	ADDRESS	BR Plant
SUBJECT	Medical Surveillance -- Asbestos Workers	DATE	May 27, 1977

Currently there are approximately 60 Ethyl Corporation (Baton Rouge Plant) workers under medical surveillance as asbestos workers. Enclosed are lists of these workers.

As noted in 1910.1001 J3, all asbestos workers are required to have medical surveillance if they are exposed to ANY concentrations of asbestos fibers.

We are now providing comprehensive annual physical examinations, including the required pulmonary function studies in addition to other pulmonary function studies. The annual x-ray is provided and read by a radiologist. The termination physical examination, within 30 days of termination on either side, is provided.

Also enclosed are copies of the standards with the medical surveillance and a copy of the questionnaire, which is self-explanatory as to the examination done on the asbestos workers.
