

C O P Y

To whom it may concern:

This is to certify that on or about September 17, 1929, I examined [REDACTED] age 21, an employee of Joseph Forcier, Gravelbourg. At that time he had symptoms suggestive of lead poisoning. A blood smear at that time showed definite stippling of the red cells, thus confirming the diagnosis.

(Signed) Ira S. White, M.D. C.M.
