Our Battle Flags Are Flying High!

- 1. First, as a growing battle on western shores of food and fuel, we have a shortage of food and fuel. And by the thousands of tons for a thousand for jobs which had before this.
- 2. And as we are making food, grain, gasoline and other goods in great quantities, we are also making and distributing them.
- 3. But did you know that National Lead has done more to help our country than any other company? It has done more to help our country than any other company.
- 4. Did you know that it is responsible for the production of about 50% of the fuel and oil in our country?
- 5. Did you know that it is the only one in our country that is responsible for the production of about 50% of the fuel and oil in our country?
- 6. Is that doesn't help a great deal to our country, then we have a shortage of food and fuel. And by the thousands of tons for a thousand for jobs which had before this.

Our Battle Flags Are Flying High!

See how all get into the battle, and in the battle and how the National Lead Company is fighting on every front.

1. They are passing battle on every front of lead and fuel. And for the future, lead and fuel are the backbone of our war effort. And by fighting here.

2. And all across the world, your gasoline and fuel are the backbone of our war effort. And by fighting here.

3. And all across the world, your gasoline and fuel are the backbone of our war effort. And by fighting here.

...Keep the *Dutch Boy*

Out in Fr

To millions of property-owners, the Dutch Boy is a familiar member of the "home-guard" ... a sturdy surface-protector who has long played a prominent role in the defense of American homes against the ravages of the weather.

Isn't it fitting, then, that today the Dutch Boy should step to the fore in another important home-front campaign—a defense this time against complacency ... against slow-downs in bond-buying, conservation, blood-giving ... against a lessening of that war spirit which flamed so fiercely after Pearl Harbor?

We think you'll agree that it is fitting. That's why, all during 1944, this famous little trade character will broadcast a stirring patriotic appeal—an appeal reminding Americans of the things they must do and must keep on doing to bring Victory nearer.

In those same advertisements, too, the Dutch Boy will tell of his own contributions to the war program—the production of pigments, oils, chem-

icals, alloys and other basic materials needed for planes and guns ... goods the Dutch Boy turns points and paint materials for civilian purposes.

Be sure to look for this new and different Dutch Boy appeal in the big national magazines: *Saturday American Magazine*, *Better Homes and Gardens* as well as in important farm papers: *Country Gentleman's Dairyman*.

Remember when you see it that this advertisement is signed specifically to help Uncle Sam. But don't forget the Dutch Boy, too ... (1) by keeping the Dutch Boy constantly in the public eye. (2) by adding to the prestige of value to every Dutch Boy dealer—not a year of peace to come.

March 1944

NOTICE: if the film image is less clear than this notice, it is due to the quality of the document being filmed

How To Set Up This Ca

For the months of March, April and May insert tab in slot as shown, Figure 1.

For all other months, open fold A, Figure 2 and turn back on 8, Figure 3. Then fold down and insert tab as shown in Figure 1 above.

Stand calendar on base 4' it is now ready for use.

Past ... Present ... Future
For your convenience here is a three year calendar that will help you track past dates and look up future ones.

The image shows a three-year calendar grid. It is divided into three main sections for the years 1943, 1944, and 1945. Each year section contains a grid of months, with each month further divided into weeks and days. The text is small and difficult to read, but the structure is clear.
