3rd March 1969

Sir Ronald Nyholm,
Professor of Chemistry,
University College,
Gower Street,
London, W.C. 1.

Dear Sir Ronald,

Dr. Blakey has told me of your concern with two statements sent to you by University College about alleged hazards from asbestos.

Mr. Bateman has suggested that it might be useful if I came and discussed the matter with you. As Chairman of the Asbestosis Research Committee, I am in close contact with all those concerned with health aspects of exposure to asbestos, and would hope to answer any questions you may have and to supply you with whatever written information you require.

If you would care to see me I could visit London on March 10th, 13th or 14th, if any of these dates are convenient to you. If not, perhaps you would care to suggest alternatives.

Yours sincerely,

R. A. Wells.

Research Director.
