Milford, Ct. 06460

Attention: Dr. Harry Agahigian

Dear Harry:

This will confirm having delivered to you for
PCB (Aroclor 1016) analysis two water samples marked
as follows:

Bridgeport Influent Tap Water 9/7/76

Bridgeport Effluent (Return to Well) 9/7/76

Each sample bottle contains approximately 1 liter,
and both were "grab" samples. The sample bottles
were rinsed thoroughly immediately before filling
with water from the stream from which the sample was
taken. As a matter of information, I took additional
identical samples simultaneously from the same stream
flow, and am sending them to another laboratory as a
cross check.

Please notify me of the results as soon as con-
venient.

Very truly yours,

CAPACITOR DIVISION
