Date : VCM UNLOADING REVISIONS - 1984 CAPITAL BUDGET
Subject : May 25, 1983

Attached is the VCM Unloading Revisions design to be included in the 1984 Capital Budget. This design provides for a new centrifugal compressor system for unloading liquid VCM from the railcars. The system should provide leak-free service and an increased unloading rate. If there are any comments concerning this design, please contact me.

By copy of this design to J. A. Dixon, a budget cost estimate is requested.

J. C. Greene
Process Engineer
