

MEMORANDUM OF CONVERSATION

TELEPHONE CONVERSATION: J. R. Soice to Bob Wesser, WVAPCC
September 23, 1981, 11:20 a.m.

1. Called Bob at the request of J. L. Worstell.
2. I told Bob that I was calling to report a release of vinyl chloride to the atmosphere. Rough calculation showed a loss of about 800 pounds. An operational problem resulted in three safety valve releases of short duration between 2:50 p.m. and 4:20 p.m. on September 22, 1981
3. I told Bob that this information had also been given to the EPA by J. L. Worstell.
4. Bob asked that I send him a note concerning the telephone conversation so that he could "put it in the file."
