

1 installation, removal and replacement?

2 A I would have to --

3 Q Take your time.

4 A They have several location notes stated as
5 note.

6 Q Do they have anywhere in there any warnings
7 to avoid breathing the dust when changing the brakes?

8 A I have not seen one yet.

9 Q Would that be because, as far as you are
10 aware, Ford didn't put any cautionary labels anywhere
11 until approximately 1980?

12 A That very well could be, yes. I certainly
13 remember when I was working in the 1950s there were no
14 warnings of any sort as far as breathing the dust.

15 Q Because you were a mechanic sometime when
16 you were financing your college; is that correct?

17 A That is correct.

18 Q Even back then, when you worked on vehicles,
19 you also ground brakes and used an air hose; is that
20 correct?

21 A I used an air hose routinely, yes.
