Attached is a copy of a booklet entitled, Asbestos In Buildings, published by The Safe Buildings Alliance. The Safe Buildings Alliance will be distributing this booklet to all of the major school districts within the United States, all state legislators, state attorneys general, newspaper editorial boards, state department health officials and potential decision influencers.

I have ordered 2,000 copies of this booklet which will be in Literature Fulfillment for use by our own people. Before we send copies to each of our employees, I would like your thoughts and comments of the advisability and approach.

Robert J. Bettacchi
