

Santiago de Chile, August 19th.1941

Dr. Robert A. Kehoe
University of Cincinnati
CINCINNATI

My dear Doctor:

Please receive my sincerest thanks for the subscription to the Journal of Industrial Hygiene and Toxicology which I receive regularly and which is a valuable acquisition to our Laboratory.-

I shall be sending you, shortly, some data which might be of interest to you.-

During the recent elections I was nominated Senator for Santiago against my wishes, however this does not affect my investigations in the Laboratory.-

I would be very pleased if you could supply me with any information regarding certain investigations made in California, relating to certain toxic states of pregnancy with perturbations of the metabolism of lead during this period.-

During the past few days I have examined a group of workmen in San Antonio who enjoy perfectly good health.-

We remind with pleasure your short stay here and hope that you will visit us again.-

Kindly convey to Mrs. Kehoe my wife's fond regards and my respects and believe me to be,

Your sincere friend

Eduardo Cruz-Coke
