To F. Scott
From D. Cox
Date 3-31-75
Subject Residual VCM in Resin Shipments

The attached table list the shipment residuals to 3-26. Note that change in analysis method occurred during this period. Before 3-19-75 all samples were collected and run in a Nitro-benzene solution after this date the shipments were sampled and sealed in vials for head space analysis. There is no difference in the final reported results.
