DOCUMENT DESCRIPTION: Memo

Memo from ALDO P. OSTI

September 26, 1973

TO: Messrs. T. J. Lee
W. M. Stephenson

From the attached you will see that Ford Motor Company is identifying what they feel is an improved technique for the determination of airborne asbestos. I think their references are rather dated. You might want to consider keeping the article for background information.

The original article is located in my office if there is a need for a better analysis of the figures.
