Dear Dan:

As requested, I have enclosed all of the quality assurance and industrial hygiene data for the pentachlorophenol and 2,4,5-T esters units at the Krummrich plant. Basically, this is a copy of the same information that I gave to NIOSH and this information was given to me by other Monsanto employees associated with the NIOSH project. Please let me know if I can offer any clarification.

Sincerely,

Terry L. Leet
Epidemiologist
