Dear Doug:

Thanks for your follow up memo on the subject of existing cost for Joint Cement, SX, to remain the same when it becomes a non-asbestos formula.

By the same token, keep in mind that as we change Water Putty, Block Filler, and Dramex to non-asbestos to keep us posted as to whether the cost remains the same or any changes that do take effect that might effect our selling prices.

By the way, just as a matter of clarification since we are switching all of the SX Joint Cement to asbestos-free as of a specific date now targeted for August 1, we will continue to keep the same item number, namely, 750-05-51-52-04 and 75552 for the various SX items and sizes.

Cordially yours,

. Julius
