SUBJECT: SPEEDENAMEL -
ELIMINATION OF LEAD PIGMENTS

cc: Mr. D. W. Eugene - UCB
Mr. C. W. Wright - UCB
Mr. J. D. Russell - UCB
Mr. R. J. Haviland - #1
→ Mr. S. T. Bowell
Mr. E. B. Euchner
Mr. J. E. Southwick
Mr. D. Sutherland
Mr. L. Nusser - UCB
Mr. C. Zibell - #1

At the Product Planning Meeting of August 18th these decisions were adopted:

1. 4520 Red would be a relabel of 917 Spred Gloss, or rather 917 would be a relabel of 4520.
2. 4510 Orange will be issued as a lead free formulation and also become a relabel for 921. This means a color change in the present 921. Present 921 does not meet ASNI Safety Color requirements.
3. 4554 Medium Green will be issued as a lead-free formulation and also become a relabel of 965. This means a color change in the present 965.
4. 4553 Dark Green will be issued as a lead-free formula.
5. 4560 Light Yellow will be issued as a lead-free formula.
6. 4540 Safety Yellow will be issued as a lead-free formula.
7. 4537 Brown will be a relabel for 937 instead of vice versa.
8. 4564 Blue will be a relabel for 988 instead of vice versa.

It was further suggested that 4572 Neutral Gray is currently a ready-mixed color. It could be made from 987 to result in lower inventory requirements or possibly be replaced in inventory by other ready-mixed colors such as Safety Green and Safety Blue.
