Dear Spence:

We are pleased to advise you that Owens-Corning Fiberglas Corporation discontinued the manufacture of our Kaylo calcium silicate pipe and block insulation using asbestos reinforcement on Sunday, November 12. As of today, November 13, our entire calcium silicate production will be produced with an asbestos-free formulation. As of this moment Owens-Corning Fiberglas Corporation does not use asbestos fibers in any of its manufactured products.

As you can well imagine, we will be shipping materials from our Kaylo inventory, which contains asbestos fibers, for the next several months. If you have any further questions regarding this matter please let me know.

Very truly yours,

L. W. Saxby
