Dear Mark:

John Telford ask that I respond to your question regarding residual vinyl chloride levels in the Vista 5585-3 PVC Resin you purchase. Based on a review of the March to May shipments, the residual levels average 0.8 ppm. The actual number for each shipment is provided to you with the certificate of analysis that accompanies each load. Please call me at 713/531-3445 if you have further questions on the above.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
