

November 12, 1935

Dr. J. T. Merwin
Athens, Ohio

amounts of lead. The finding was .05 mgs. per liter which is well within the normal limits. I think, therefore, this excludes the likelihood of any appreciable or significant lead exposure on this man's part. However, if anything happens to confirm your tentative conclusion that lead may have entered into the picture, I would be very glad to hear from you further.

Cordially yours,

RAK:is

Robert A. Kehoe, M.D.
