Product Acceptability Practices

Paper No. 8, Revision 1

Date: December 11, 1974

SUBJECT: FDA PLANT AND WAREHOUSE INSPECTIONS

Attached is Revision 1 of the procedure to be followed in handling plant and warehouse inspections by representatives of the Food and Drug Administration. Please destroy the procedure issued as Paper No. 8 on September 16, 1974, and replace with this revised document.

To facilitate your understanding, new or altered statements are identified by vertical marginal lines. Again, careful study of this revised procedure is necessary. Please refer any questions on interpretation to Holly Groat, with copies to me and the Manager, Product Acceptability for your division.
