

KEENEY PUBLISHING COMPANY
6 North Michigan Avenue, Chicago 22, Ill.

Heating, Piping and Air Conditioning

This is the publication which carries the Journal of the A.S.H.V.E. in addition to its own regular editorial section. Its field is that of industry and large buildings. It is devoted to the design, installation, operation, and maintenance of heating, piping and air conditioning systems in such plants and buildings.

Each January issue includes a complete directory of commercial and industrial heating, piping, and air conditioning equipment, which lists all products, their trade names, and the manufacturers' addresses. It is the established buying and specifying guide of the industry.

H. P. & A. C. is read by consulting engineers and architects . . . contractors . . . and engineers in charge of heating, piping and air conditioning in industrial plants, and other large buildings, federal, state, and city governments, school boards, and public utilities. All A.S.H.V.E. members are subscribers.

Such coverage means, for the advertiser, consideration at all points in the selling of a heating, piping, or air conditioning product . . . consideration in its selection during the preparation of plans and specifications; in its year-round buying for operating and maintenance requirements. Without waste, the manufacturer of air conditioning products and equipment can reach through H. P. & A. C. those from whom he is seeking the necessary engineering acceptance. Write us for full information.

Subscription Price—No. and So. America—\$2 per year. Elsewhere \$4 per year.

American Artisan

AMERICAN ARTISAN covers the field of warm air heating, residential air conditioning, and sheet metal contracting. Its readers are warm air heating and sheet metal contractors, dealers, jobbers, manufacturers, and public utility companies.

Each January issue includes a complete directory of warm air heating, air conditioning, and sheet metal products and equipment, which lists all products, their trade names, and the manufacturers' addresses.

A special section of each issue has been devoted to air conditioning since 1932, when it first became apparent that air conditioning for homes was to be along the lines of the central forced warm air heating system. As a result of the ready adaptability of this type of heating system to all air conditioning factors, tens of thousands of homes today have winter air conditioning—supplied through forced warm air heating with air cleaning and humidification. Cooling apparatus can be attached to these systems readily whenever year-round air conditioning is desired.

The key man in the residential air conditioning picture is the warm air heating and sheet metal contractor—the one man experienced in "treating air" at a central place and getting it properly distributed. And the key publication—because it reaches these key men with an information service that has made it the recognized authority on residential air conditioning practice—is **AMERICAN ARTISAN**. For full information write us.

Subscription rate—\$2.00 per year. Member A.B.P.—A.B.C.

DOMESTIC ENGINEERING PUBLICATIONS

1900 Prairie Avenue, Chicago, Illinois

Domestic Engineering Magazine

IN recognition of valuable service rendered to its industry on wartime fuel conservation, *Domestic Engineering* won first award for editorial achievement again in 1943. Reaching the top group of contractor-dealers in the plumbing, heating, and air conditioning field, *Domestic Engineering* continues to expand its position of leadership established through 54 years of serving the industry.

To its readers *Domestic Engineering* offers an authoritative source of information, a constant touch on ever-changing conditions and a practical approach to the problems encountered by all branches of their industry.

To manufacturers faced with these problems of war conditions, and of post war planning and achievement, *Domestic Engineering* represents a media of prime importance to the field, and an exclusive source of information and service pertaining to such problems.

Domestic Engineering Catalog Directory and Air Conditioning Blue Book

PARTICULARLY designed as a complete buying and specifying guide and reference source for the use of buyers, specifiers, engineers and contractors on plumbing, heating, air conditioning and related equipment. **DOMESTIC ENGINEERING CATALOG DIRECTORY and AIR CONDITIONING BLUE BOOK** condenses and arranges all necessary data for quick and easy reference.

Five distinct sections . . . **MANUFACTURERS' CATALOG SECTION** . . . Up-to-the-minute buying and specifying information on products used in this industry. **TABLES AND RULES SECTION** . . . specifying data condensed to standard Tables, Rules, Charts, and Layout Diagrams on plumbing, heating and air conditioning. **CLASSIFIED DIRECTORY** . . . giving every known product in the industry and its manufacturer. **TRADE NAME SECTION** . . . Trade names of all products used in the field and the names and addresses of their manufacturers. **NAME AND ADDRESS SECTION** . . . listing the name and address of every known manufacturer in the industry.

DOMESTIC ENGINEERING CATALOG DIRECTORY and AIR CONDITIONING BLUE BOOK is used constantly throughout the year by the leading buyers and specifying engineers in the field . . . and in addition goes to all essential war activity officials. Thus it presents to manufacturers a highly productive method of displaying product information to the right men in the market.
