Liver Function Study - W. Compton

On July 28, 1964, Mr. Crunkleton received the following report from W. E. McCormick on the liver function study of W. Compton. This specimen had been sent to Akron on July 15, 1964.

Date Received	Name	Cephalin Flocculation		Thymol Turbidity	Total Bilirubin (mg.%)
		24 hrs.	48 hrs.		
7/15/64	Compton, W.	1+	2+	1.5	.4

On the report we were advised to have a repeat sample collected and forwarded to McCormick as soon as possible. Will you please take care of this on Compton?

T. C. Bolly
