PREVENTIVE MEDICINE
DIVISION OF
INDUSTRIAL MEDICINE

July 22, 1958

Dr. Robert A. Kehoe
The Kettering Laboratory
University of Cincinnati College
of Medicine
Eden Avenue
Cincinnati 19, Ohio

Dear Kehoe:

Your letter has greatly perturbed me, since my respect for the work that has been done by you or under your leadership should be above suspicion. I always have quoted and shall quote in the future the outstanding papers mentioned in your letter whenever they deal with our problems.

I take the full responsibility for the fact that the references have been omitted from Dr. Robinson's paper, since he had listed them and I took them out. The only reason for my doing this was the necessity to limit the discussion, and hence the references, to the simple subject of normal lead levels in infants and children. A great number of other references, too, had to be omitted for the same reason.

I earnestly hope that you will accept this explanation of the omissions.

With best regards, I am

Sincerely yours,

H. Brieger
H. Brieger, M. D.
