Dear Dr. Dietz,

I would like to thank you, most sincerely, for the help you gave me when I visited you, along with the subsequent information which you have sent to me.

I have forwarded your answers to Sir Richard Doll, along with copies of the final draft of the Tabershaw and Gaffey up-date. I will certainly send you a copy of the UK Fox and Collier up-date when I have sent the final draft.

I feel that you may care to have a preliminary draft of the Italian Study on VCM manufacturers, and I am enclosing a copy.

I am forwarding, as promised, the latest W.T.R. Safety Data and Handling Precautions.

I would be most grateful if you could keep informed re the individual who worked in the Fabrication Industry, and who developed ASL, about whom Court proceedings are pending. Thank you for advising me that S. Ferguson of your Louisville Plant is still alive. I hear that you have another ASL case at Louisville in an individual who first worked there in 1940, and is now aged 72. Once this case has been confirmed, and you are in a position to inform me of it, I should be most grateful for details.

Thank you very much for sending me the information with reference to the B F Goodrich, Long Beach Plant. If you hear of any Studies being instigated on Plant neighbourhoods, or reprotoxicity studies, I would very much like to be kept informed.

Thank you, once again, for all your help. If ever you visit the UK, do not hesitate to contact me. I will, of course, keep you informed of European developments.

Yours sincerely,

B BENNETT

P.S.

While in the States you mentioned that two cases of ASL had occurred in Brussels. You stated that one had been settled out of Court, and that the other was still being contested in Court. You said that you had shared liability with the fabricator. I was wondering if it would be possible to have more details?
