Chicago

Dr. C.-E. A. Winslow
Vice-President, N.S.C.
New Haven, Conn.

February
9
1932

Dear Dr. Winslow:

On my return this morning from Kansas City I was asked to meet Mr. H. S. Simpson, the President of the Foundry Equipment Manufacturers' Association of Cleveland. Mr. Simpson is also President of the National Engineering Company of Chicago, manufacturing the so-called shake-out equipment for foundries.

Mr. C. E. Hoyt, the Manager of the American Foundrymen's Association, was also present at the conference and both these gentlemen told me that the whole foundry industry is much disturbed about the accuracy of the study report of the Committee on Health Protection in Air Pressure Cleaning.

I have discovered that Mr. Ohlson, of the American Foundrymen's Association will be unable to attend the suggested February 23 meeting in New York; I discovered that the representative of the National Foundrymen's Association is dead, and so far we have received only three letters from the committeemen in answer to the suggestion for a February 23 meeting.

I shall be in Cleveland tomorrow, but towards the end of the week will write you again on the total response to the suggested February 23 meeting. It looks to me now as though we might judiciously postpone the February 23 meeting for, say, a month or more until we can hear something more from these foundry people.

Sincerely yours,

W. H. Cameron
Managing Director
