Interoffice
Communication

VISTA

I. Injury & Exposure Trends

Injuries

- Team investigation recommendations - DWH to update.
- Although not formally approved at time of meeting, departmental programs were in place and going.
- Supervisors to be added to first aid log distribution when injuries occur.
- A lot of discussion occurred regarding the use of names on injury occurrence charts. It was decided to use the method plantwide.
- As a whole, the group felt that the downward injury trend was due in part to increased emphasis. Attitudes also played a part in the trends.

Chemical Exposure

- WHMc will check on the accuracy of the VCM samples values.
- PJK will review our overexposure concerns with a Line III Compounder.

II. Subcommittee Progress

- Interlock and Alarm Setpoint - Reactor interlocks are being checked now.
- Vessel Blinding - As noted in agenda.
- Tools - Chain falls are being tested.
- Operations, Maintenance, Lab -
 - . DWH/PJK to plan unannounced drills
 - . Casual VCM exposure control method to be developed by DWH/CWT by 4/1/86.
 - . Timing for mandatory training:
 - First Aid - February or during optional month.
 - Hazard Communication - April
 - Chlorine - May
 - Health/Hygiene - September
 - Fire - October
 - . Chemical Transportation Incident Response Plan (CTIRP) Training on Plant Plan to be done some time this summer.

III. Department Safety Programs

Discussed in Injury reviews above.

IV. Other

- Respirator Program and 1986 Training Plans were discussed as noted in agenda.
- The Safety awards issue was discussed relative to how we publicize our progress. JWW agreed to write some articles for publication in local papers.
