Interoffice Communication

To C. L. Whetstone, M.D.

From J. J. Hall

Date December 22, 1980

Subject

Regarding your memo of October 22, we reiterate our support of your efforts to computerize employee health data. The data being generated cannot be properly utilized without automated processing.

The new OSHA Standard on Access to Employee Exposure and Medical Records reinforces the need for computerization.

In previous correspondence, R. E. Lehmkuhl has emphasized our support of your efforts in this area. We remain interested and supportive. The time is rapidly approaching when computer capability will be a necessity.
