12-9-70

H Bergen,

1. Shrimp Escambia Bay - PCB content 0.1 to 0.6 ppm. Conc. lower than Commercial Fisheries Limit (up to 7ppm in edible parts)

2. Pig fat and liver - Analysis graph developed. Lab is now calculating to quantify the [illegible].

3. GE water samples - PCB detected in very low quantities. 50 ppb in one sample was the highest. This is lower solubility level. Additional samples were sent this week for confirmation

4. US Steel sample had 1.1 ppm 1242.
