

August 23, 1979

Mr. Fred Stallworth
District Staff Manager, Safety
639 Hurt Building
Atlanta, Georgia 30303

Dear Fred:

Enclosed is a copy of a letter from Mr. W. T. Thornton.

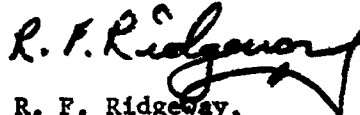

This letter covers a test and the results of same which was performed by Du Pont for evaluation of airborne asbestos fibers generated from a hand-operated Yankee drill drilling into asbestos containing wallboard (Transite).

They have asked for a procedure which Southern Bell in South Carolina will follow.

Will you please provide the procedure for handling this type of drilling. I will be glad to forward it to Mr. Thornton if you so desire, and after approval will see that supervisors who are responsible are made aware of this procedure.

Should you need further information, please advise.

Yours truly,

R. F. Ridgeway,
Associate Staff Manager - Safety

Encl.
