Dear [REDACTED]

Thanks for the update. Yes, we have a copy of the results local to our production facility.

For information, I am leaving AGCCE at the end of the year so please direct future communications on this topic to [REDACTED] who has been cc-ed on our discussions.

With kind regards,

[REDACTED]

Morning [REDACTED] Thanks for the Email.

So we included the analysis on the fish fillet samples from Morecombe bay which were shared with the FSA. I will chase them up to see if they are publishing the work. With regards to our wider fish monitoring we are now waiting for this years data to be analysed before we start reporting. The SAA-1000 was not found in any of the samples so it is unlikely we will be looking to fully validate the substance for our routine monitoring. Once we write this work up we will obviously report on this and I will share this with you. We have had some delays with a lab closure so this might be middle of next year now.

In the meantime, I believe you have had the data from the analysis?

Many thanks [REDACTED]

Hi [REDACTED]

I see no significant issue with citing the data, it normally takes a few month to get on our external servers. Just cite as "EA Morecombe bay investigation – fish tissue analysis 2023" or something similar and note the data was obtained by request.

When using the data note these are "fish tissue" analysis as opposed to whole fish, as we were particularly interesting in the edible parts and risk to human health. Whole fish concentrations are normally 3 times as high as the tissue so the results can only really be compared to other, consumption based studies.

Many thanks [REDACTED]

Hi [Redacted]

Just a brief follow-up question, is AGCCE able to cite this data publicly yet or do we need to wait until formal publication? If so, what do we use as the citation (for example, EA Annual Fish Survey 2023, publication pending)?

With thanks,

[Redacted]

Hi [REDACTED]

Firstly apologies for the delay in my reply. I have attached the results for our fish monitoring across the northwest. Concentrations are in ug/kg.

We haven't done any interpretation of the results yet (I had hoped to!) but we are looking to publish the results externally.

If you have any questions let me know.

Hi [Redacted]

I have sent the results to the EA last Friday, but as they paid for the data they own it so it wouldn't be proper for me to share it with you. [Redacted] can you share the fish data with [Redacted] please?

As expected, we didn't find any quantifiable levels of your chemical in any fish. I think there were a couple of hits below LOQ but they weren't associated with samples from the Wyre.

Kind regards
