Sir:

A notice was received at this office concerning the use of ASKAREL in transformers.

At present we have one 5000 KVA transformer and a number of smaller sizes from 10 KVA - 50 KVA, general electric transformers which use "PYRANOL".

The notice stated that a copy of reference "b" would be made available upon request. Please forward a copy of reference (b) to this office.

Is there a Monsanto Area Representative any where in Japan, or the Far East? A contact in this area would make the disposal much easier, if needed.

Respectfully,

[redacted], USN
Utilities Chief
