Eden Street
Cincinnati 19, Ohio

Dear Doctor Kehoe:

I am forwarding a batch of blood samples for lead analysis. We would appreciate as rapid an analysis as is possible.

What significance, if any, do you attach to the figures represented as weight in Grams in your reports that you send back to us? There is quite a difference in these quantities. I would like to know the exact interpretation of these quantities.

Very truly yours,

Conrad T. Rusin, M. D.

CTR:gs

Dear Doctor Kehoe:

The blood samples will be analyzed and reported to you as quickly as possible. The general volume of our work is such that the samples that come in have to take their normal sequence, except in the event of a rather crucial medical situation relating to the care of a patient. Usually there is little delay.

The data on the report sheet are given largely as requested and prepared, i.e., that of making the best interpretation of the results that can be given. They need not concern you at all. However, in the
