Commission Regulations (EU) 2017/1000 and (EU) 2019/1021**Nafion™ Membranes, Dispersions, and Resins**

The EU has taken measures to regulate PFOA, its salts and PFOA-related compounds in a wide range of products under Annex XVII of EU REACH, Commission Regulation (EU) 2017/1000 and Annex I to Regulation (EU) 2019/1021 (EU Persistent Organic Pollutants Regulation) (as adopted on April 8, 2020 and with an enforcement date of July 4, 2020). These regulations require, subject to certain exceptions, that from July 4, 2020, mixtures and articles placed on the market in the European Union will require a concentration of ≤ 25 ppb of PFOA, including its salts, and ≤ 1000 ppb of one or a combination of PFOA-related compounds.

PFOA is not used by Chemours, or intentionally added, in any of its manufacturing processes. However, as a committed supplier, we have analyzed **Nafion™ Membranes, Dispersions, and Resins** for trace levels of PFOA for compliance with Commission Regulation (EU) 2017/1000 and (EU) 2019/1021, using a protocol developed by Chemours. For details of the test method, click on the link below:

Based on analytical test data for representative samples of **Nafion™ Membranes, Dispersions, and Resins products**, and based on our knowledge of the manufacturing processes used to produce these products, **Nafion™ Membranes, Dispersions, and Resins** are compliant with (EU) 2017/1000 and (EU) 2019/1021.

Compliance of finished products made using Nafion™ products is the responsibility of the manufacturer and seller of the finished product.

Thank you for using Chemours products. If you have any additional questions, please feel free to contact your Chemours Account Manager.

Sincerely,

Susmita
