Thank you for letting me have the results of dust tests. I have checked in my correspondence and can find no formal commitment to communicate the results of these tests to Manchester Corporation, though I believe that we did make a verbal undertaking.

I think that there would be no harm in divulging these results, which seem to me remarkably good, from a public health point of view, but I would suggest that we do not in fact go out of our way to take the initiative in this matter. Itwould be more sensible to wait for them to approach us.

I think that any reply to the Corporation should come from me, and I would be grateful if you could let me know if you do have any approach from the Corporation on this matter.

W. P. HOWARD
