
1995 Consolidated Audit Reactive Chemicals

III. Questionnaire Results

III. Questionnaire Results

1. Section U, Question A. - Reactive Chemicals Training:

CMP Personnel knowledgeable in reactive chemicals, however need to consolidate that knowledge in IPT format for easy access and training.

2. Section P, Question A. - Dead headed pumps:

Not all CMP pumps are protected or alarmed by instrumentation vs. dead head. Operator rounds are used for this purpose. This is an exception that CMP feels we are adequately protected, but not totally protected.
