Tranton, N. J. 08602

Dear Harry:

These are our comments regarding Mike Kodaras' letter report dated July 17, 1967 on the 2,000 ft. per minute air erosion test.

I understand from Bert Levine that the times listed are not accumulative, which indicates that the total test time was 48 hours. This is not clear in this letter. It would be nice to have a plot of time versus gain to show the decay rate.

It is strange that all four results had a net gain each of .009. You might check again with Kodaras to make sure that these are the correct values.

Sincerely yours,

Frank M. Stumpf
