From Orrel Highlands to Seaside, the Monterey peninsula has entered an era of development which will not stop until all of the choicest lots and acreage will be occupied by homes. Now is the opportune time to purchase land and build your own home. Values are far below those in other parts of California considering the wonderful advantages and future of this section. It is far cheaper to own your own home than to rent one.
The merchants whose ads appear on this page will gladly furnish you "gratis" all kinds of information that will show you "How to Build Economically."

Certain-teed

STUCCO AND CEMENT PAINT

This is a most excellent preparation put up ready for use on stucco and cement work, concrete abutments, brick and terra cotta, and on all other like surfaces found in home, farm and factory construction subject to weather exposure.

In residence work Certain-teed Stucco and Cement paint is especially effective. The harshness of the raw stucco is mellowed to a warm, velvety matt finish, dusting and crumbling are retarded, and the danger of dampness in the wall structure, and of soot, dirt and rain streaking are minimized.

Certain-teed Stucco and Cement Paint contains nothing injurious to the texture of the concrete. The ingredients as combined are remarkable for their peculiar protective qualities and resistance to the action of sulphur fumes, oil, grease, water and weather and to chemical reaction of the surface to which applied.

Because it closes the pores and hardens the surface, and is long lived and wears well, Certain-teed Stucco and Cement Paint will be found most satisfactory for the purposes for which it is intended.

Certain-teed Stucco and Cement Paint covers from 150 to 500 square feet per gallon two coats. It dries in from 24 to 48 hours.

Wall Paper

Star-Peerless is one of the very few wall paper mills in the country which produces, in its own color works, all of its own pulp colors. Here, by means of the most modern equipment which can be bought, are produced colors of uniform excellence—carefully tested and mixed under the watchful eyes of experts.

The making of colors is too important to be left in the hands of an outside organization. When we manufacture them ourselves we know they are of uniform shade and excellence, and that they possess the correct chemical balance to make them retain their brilliance for the longest possible time. They are the finest that can be made.

THE HOME BEAUTIFUL

No two people have the same ideas in the designing and building of a home. This is the reason it is wise to consult an expert when you are ready to build. The many homes I have designed and built on the peninsula are distinctive and different. It will be a pleasure to show them.
