Mr. George Pottigrew, Regional Director
National Institute of Occupational
Safety and Health
1100 Commerce, Room EC53H
Dallas, Texas

Attention: Harry L. Markel, Jr., P.E.
Regional Industrial Hygienist

Dear Mr. Pottigrew:

This will confirm the conversation of this date between Mr. Harry Markel and Mr. Herman Adrian concerning the proposed industrial hygiene survey at the Pittsburgh Corning plant in Tyler, Texas.

Following the discussion between Mr. Markel and Mr. Adrian, Mr. Charles E. Van Horn, Manager of Pittsburgh Corning Company, was contacted. The dates of October 26-29 for the survey are agreeable with Mr. Van Horn. He stated that all medical files and related information would be fully available to the survey team. He further stated that he was familiar with the ventilating system and felt that he would be in the position to supply the desired information relative to its performance.

For convenience, I will list the Tyler telephone office number of this firm should you have an occasion to make contact. The number is area code 214, 877-2411.

These people have been fully cooperative in our contacts with them and I am sure that this will be the case during the proposed survey. Mr. Adrian plans to be supportive to the survey and to be present to assist in any way desired.

Sincerely,

Martin C. Wukasch, P.E., Director
Division of Occupational Health
and Radiation Control

cc: Pittsburgh Corning Company
cc: Region VII
