Evidence-Based Policy Act Could Change How Feds Use, Share Data

The bipartisan Foundations for Evidence-Based Policymaking Act would drive every agency to hire a chief data officer, expose more data for public and interagency use and change how program success is measured. But first the hard part: Settling on open data standards. [Read More](#)

How Employers Try to Retain Tech Talent

The global shortage of IT and cyber talent pits industries against each other in a battle for talent. While salary makes a difference and perks are attractive, the most important reasons current employees often choose to stay put are mission, flexibility and good, old-fashioned

appreciation. [Read More](#)

Calculating Technical Debt Can Focus Modernization Efforts

Tracking technical debt isn't just for agile developers. Figuring out the hidden, long-term costs of maintaining legacy systems is also key to understanding whether it makes economic sense to keep those systems running or shut them down for good. [Read More](#)
