Subject: RE: BHRC... Shanghai CC Study Progress Report for Jul-Dec, 2003

Question: Do we have a process in place to review the progress reports (excluding financials) to determine whether we believe that expectations are being met? I don't recall one. If not, let's give it some thought and discuss at our March call.

Example: With the numbers provided by Otto on number of cases, we could start to build in the case accrual vs. financials that we discussed in November.

Regards,
Patsy

Subject: BHRC... Shanghai CC Study Progress Report for Jul-Dec, 2003

Benzene Health Research Consortium (BHRC) Oversight Committee, Technical Committee, Science and Ethics Review Panels -

Attached for your review and consideration is the latest Progress Report from Dr. Otto Wong on the AML and NHL Case Control (CC) Study, covering the period July - December 2003, along with a second file containing an organizational chart for the Shanghai project team -- both in Adobe pdf and Word doc formats. Please note that any large embedded question marks [???] in the pdf version of the progress report represent non-transcribed Chinese pictographic characters.

This progress report and attachment will also soon be available on the Shanghai Health Study website.

Similarly, API expects to soon receive a progress report for the Shanghai Disease Progression (DP) and Molecular Epidemiology (ME) studies from Dr. Richard Irons.

With best regards - Bruce.
