Subject: Request from CBS News - On Deadline

Hi Enesta and Tricia,

Nicole Keller here from CBS This Morning. We're working on a story about drinking water airing TOMORROW morning.

The Environmental Working Group says that the U.S. Environmental Protection Agency has failed to protect the public with its drinking water standards. They say the standards aren't protective enough and the standards haven't been updated for decades for a variety of substances and contaminants, including radium. Does the EPA have a response?

We are on deadline for early tomorrow morning so we would need this information by end of day.

Thanks very much,
Nicole

Nicole Keller
